O. OBEFREE

TECHNICAL & PRODUCT PARTNER

From idea to working pilot - fast.

Founder-led product and engineering partner for EU and international consortia: software, AI, interactive systems, gamification, 3D/XR, audio/music tech and measurable digital pilots.

AI & data | Web / mobile | 3D / XR | Games & gamification | Audio / music tech | EdTech / media literacy

What we can own in a consortium

01 Technical work package
Architecture, frontend/backend, integrations, AI-enabled features, APIs, deployment, data flows and technical documentation.

02 Rapid prototype & pilot
Turn a proposal concept into a testable product, then run real-user pilots and iterate from evidence instead of slideware.

03 Interactive experiences
Browser 3D, XR/VR concepts, simulations, serious games, game systems and playful interfaces for engagement and training.

04 Measurement & product analytics
Behavioural events, pilot instrumentation, dashboards, experiment design support and evidence-ready product telemetry.

Working demonstrators - not just capability claims

1	**Faking News / Critical Mind** Game-based media literacy, source evaluation, manipulation patterns and measurable user decisions.	play.obefree.com
2	**Critical Reading** Contextual browser analysis and evidence-oriented reading interventions for real online content.	criticalreading.obefree.com
3	**RecoTune** Tuner + recording studio + playable instruments; expandable into AI, 3D, collaborative and game-based music experiences.	obefree.com/recotune
4	**Atlas / Nova / 3D World** Interactive 3D, game tooling, AI-assisted creation, browser scenes and immersive prototyping.	obefree.com

Looking for coordinators and complementary partners

Universities & RTOs | NGOs & media | creative/cultural organisations | music-tech & game companies | SMEs with domain access | pilot hosts
